Sainik Awas Marga, Bijeswori-15, Kathmandu.

SOFTWARE DEVELOPER

I am a passionate and dedicated individual with a keen interest in graphics designing, UI/UX, programming, and web designing. Over the course of my academic journey, I have solid foundation in these areas and have consistently excelled in related coursework and projects. I love to explore and expand my skills in these areas, I am eager to contribute my expertise to meaningful projects that push boundaries and make a positive impact. I believe that blending artistry with technology has the power to transform how we engage with the world, and I am excited to be a part of that transformative journey.

PROJECTS

Project Third Vision

<https://github.com/initialrise/AsianHack2022>

The project is designed as a web application, enabling users to upload images or use a video feed for real-time object detection. Developed by the "Brogrammers" team for the Asian Hack 2022 hackathon, the project secured the third position.

OpenCV YOLO Flask

Project Aparichit

<https://github.com/yugesh-shilakar/aparichit>

A website promoting transparency and citizen participation in Kathmandu. It facilitates reporting corruption, accessing emergency services, sharing suggestions, and seeking assistance anonymously.

HTML CSS JS PHP

Project PayoWork

<https://github.com/PayoWork/PayoWork>

PayoWork is a freelancing platform specifically designed for individuals and businesses in Nepal. It provides a comprehensive solution for both remote and offline freelance work opportunities, connecting skilled professionals with clients seeking their expertise.

HTML CSS JS PHP

Project YAnimee

<https://github.com/yugesh-shilakar/YAnimee>

This project allows users to browse and stream their favorite anime shows and movies. It provides a user-friendly interface and various features to enhance the anime streaming experience

ASP.NET EF core MS SQL Server
